

DIN Rail Mount Indicators

RM4-V4 4 input Arithmetic/Scanning

Accepts up to 4 channels of $\pm 1\text{VDC}$ or $\pm 10\text{VDC}$

Features

- Pushbutton calibration and setup
- 5 digit LED display and relay /alarm status indication
- Up to 4 inputs
- Powered by 240V, 110V, 48V, 42V, 32V, 24VAC, or 12 to 48V DC(factory configured)
- Digital filter for improved stability
- Two alarm/control relay outputs (5A) standard with choices of operation from rate, total or pass
- Display auto-dimming feature. Switches display to a programmed level to conserve power
- Programmable display brightness reduces power consumption and controls glare in low brightness areas
- Rugged aluminium DIN rail mount housing
- Remote input to perform special functions e.g. totaliser rest, zero, tare/gross/net, peak hold, display hold, max/min, scale switching or security lock out
- 2 year guarantee

Description

Model RM4-V4 is a DIN rail mounted process unit which can function as an indicator/alarm/controller/transmitter/computer interface. The RM4-V4 accepts its input from $\pm 100\text{mV}$, $\pm 1\text{V}$ or $\pm 10\text{VDC}$.

Two operation modes allow the RM4-V4 to be used either in arithmetic or scanning mode. The arithmetic mode allows input combining and manipulation via an arithmetic formula. Up to four inputs (Ch1, Ch2, Ch3 & Ch4) can be combined arithmetically using the versatile formula above. The instrument is ideal for situations requiring multi-input source calculations such as:- density correction, temperature compensation, combining from more than one source, ratios etc. In scanning mode up to four inputs to be scanned automatically (with selection of scanning period) or manually via the and pushbuttons.

Two alarm relays are provided as standard. The relays can be set to operate from any input channel, in arithmetic mode they can be set to operate from any input channel or the result. Combinations of optional outputs including extra relays, analog retransmission or serial comms. (ASCII or Modbus RTU protocol) can also be optionally provided.

The RM4 has an automatic display dimming function available. This will switch the display brightness after a configured time. The display will return to the "bright level" if an alarm condition is met or if one of the front buttons is touched.

The RM4 also has a programmable display brightness function, this allows the unit to be operated with low display brightness to reduce the instrument power consumption and to improve readability in darker areas. This function is switched using a remote input connection.

The programmable digital filter improves stability by smoothing out short term interference. Electrical isolation between power supply, input signals and retransmission eliminates grounding and common mode voltage problems.

Specifications

Technical Specifications

- Input types: $\pm 100\text{mV}$, $\pm 1\text{V}$ or $\pm 10\text{V}$
(link selectable)
- Input resistance: $1\text{M}\Omega$ (Voltage)
- ADC resolution: 1 in 20,000
- Accuracy: 0.1% when calibrated
- Sample Rate: 1 sample per second per channel
- Conversion: Dual Slope ADC
- Microprocessor: MC68HC11 CMOS
- Ambient temp: -10°C to 60°C
- Humidity: 5% to 95% non condensing
- Display: LED 5 digit 7.6mm and alarm annunciator LEDs
- Power supply: 240V, 110V, 48V, 42V, 32V, 24VAC
50/60Hz,
or 12 to 48VDC (factory configured)
- Power usage: AC supply 6 VA max,
DC supply, <6W (depends on load & options)
- Output (standard): 2 x relays, form A, rated 5A resistive 240VAC
- Relay action: Programmable N.O. or N.C.
- Output Options - see below for full list**
- Third relay : Rated 0.5A resistive at 30VAC or DC, form C if no other options fitted (otherwise form A)
- Fourth relay: Rated 0.5A resistive at 30VAC or DC, form A
- Retransmission: Analog 4 to 20mA, 0 to 1V or 0 to 10V link selectable
(single or dual channel versions)
16 bit single channel available
Serial RS232 or RS485, choice of ASCII or Modbus RTU protocols (factory configured)
- DC voltage out: Isolated 24V at 25mA or 12VDC at 50mA (link selectable)

Physical Characteristics

- Case size: 44mm x 91mm x 141mm
- Connections: Plug in screw terminals
- Weight: 500g basic model,
550g with option card

RM4-V4 Order codes

The last section is for optional outputs, if required. (Note: only one of the optional outputs below can be fitted).
